

IN THE DRAWINGS

Attached to the present response, Applicant is submitting replacement sheets for Figs.1, 3, and 6-8. These Figures have been revised to change, where appropriate, “modulation scheme” to ---demodulation scheme--- in accordance with the Examiner’s requirement. These changes do not introduce new matter into the disclosure of the present application, but rather more clearly define the features of Applicant’s invention in an internally self-consistent fashion. Entry of the attached replacement sheets is respectfully requested.
